BRANDY VAUGHAN'S DEATH STILL UNDISCLOSED + THE REALITY OF OUR HEALTH

DECEMBER 11, 2020 CAP ALLON

Brandy Vaughan, the founder of the non-profit anti-pharmaceutical movement Learn the Risk, has passed away at the age 47.

Vaughan described herself as a "former pharmaceutical insider on a mission to create a healthier world one person at a time by educating on the real risks of pharma drugs and vaccines."

When working in the pharma industry, Brandy sold Vioxx, a painkiller that was found to double the risk of stroke and heart attacks.

"From that experience, I realized that just because something is on the market doesn't mean it's safe," Brandy said: "Much of what we are told by the healthcare industry just simply isn't the truth."

It has not been revealed how Brandy died.

Since the announcement of her death earlier in week, thousands of tributes have poured in with many thanking

her for "fighting the tough fight against big Pharma!"

Another woman wrote: "A true hero, inspiring me to learn more and be braver. The time I had to learn from her and to chat with her and made a lasting impact. Her legacy will live on and on. May she receive justice."

Dr. Judy Mikovits posted a tribute on Twitter, asking that people give what they can to the gofundme page setup in Brandy's honor, to help support her website and survived young son (the page has since inexplicably been removed):

1.3K 509 people are Tweeting about this

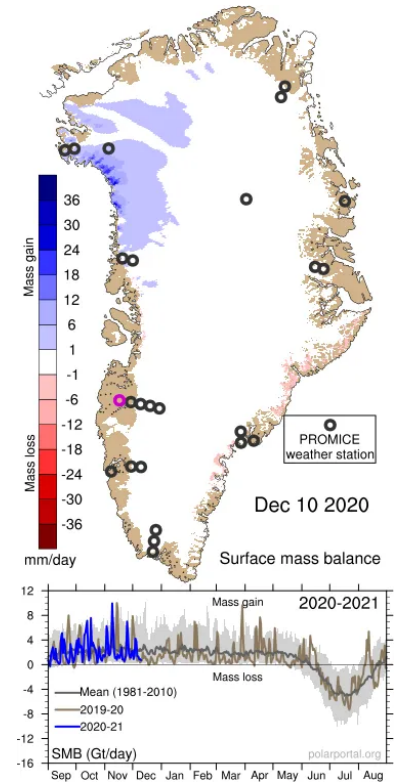

Brandy had long-feared for her own life.

Her activist efforts regularly put her in the path of Big Pharma, and she lived with the constant fear of being poisoned.

So concerned was Brandy that she was prompted to post 'these ten facts' on her Facebook page, and urged her followers to screenshot them for the record.

Number 8 on the list reads:

LATEST GREENLAND SMB

DANISH METEOROLOGICAL INSTITUTE

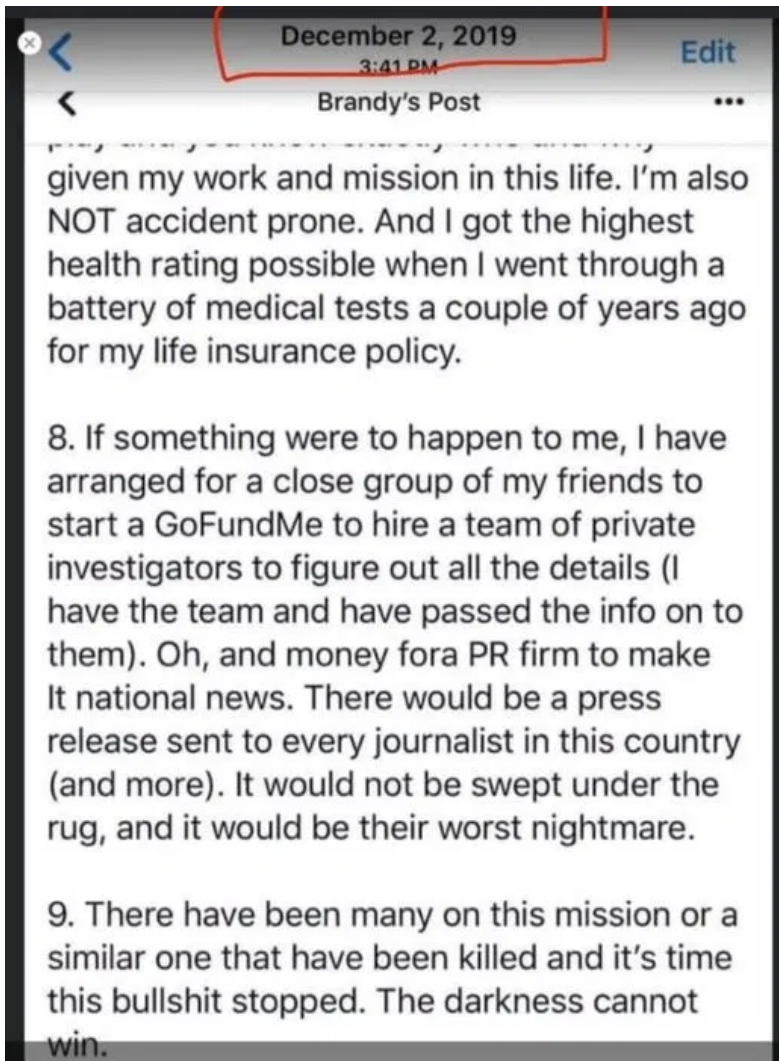

LATEST NORTHERN HEMISPHERE SNOW MASS TOTALS

FINNISH METEOROLOGICAL INSTITUTE

LATEST SUNSPOT NUMBER THRU NOV 2020

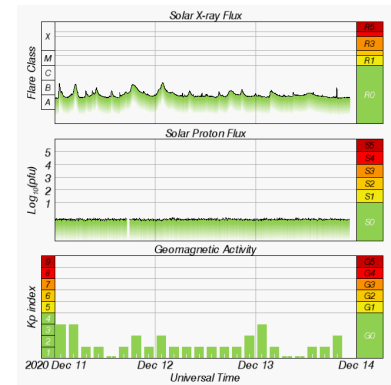

Number 9 reads 'there have been many on this mission or a similar one that have been killed' — and one such person was a "Dr. Ben" who Brandy, in a text message to friend Dr. Shannon Kroner, wrote of how she was upset and concerned regarding the consequences of his untimely death:

SIDC

LIVE SPACE WEATHER OVERVIEW

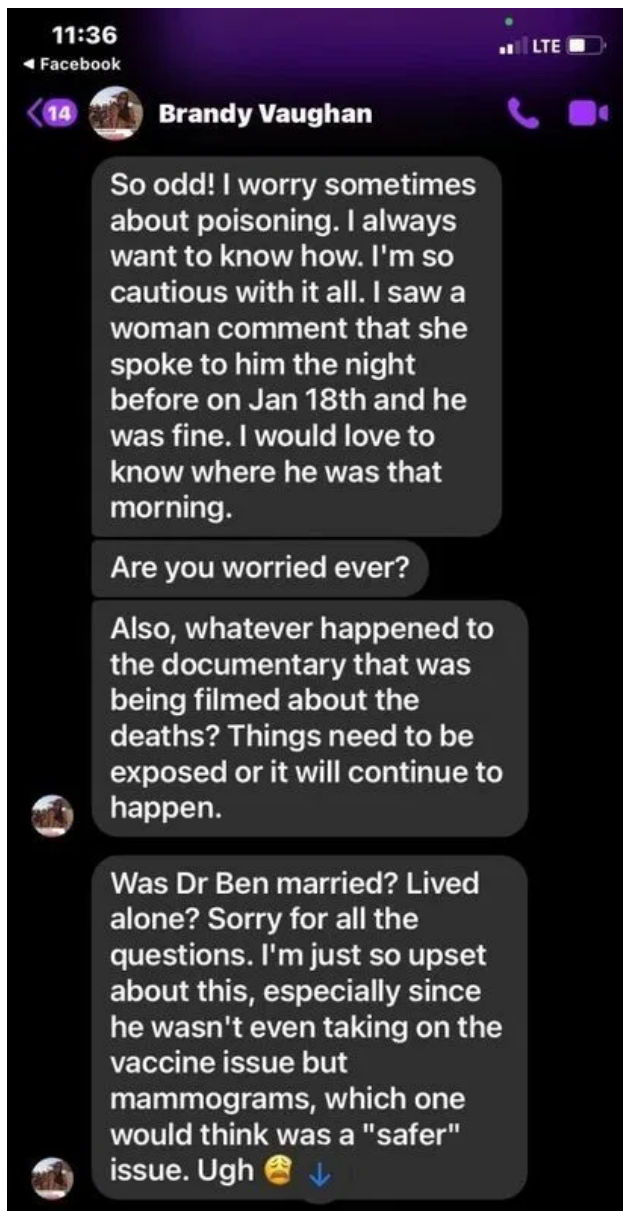

SWPC / NOAA

DECEMBER 11:

UK's highest recorded temperature for this day was the 17.7C (63.9F) set at Penkridge (Staffs) in 1994.

Climate is cyclic, never linear.

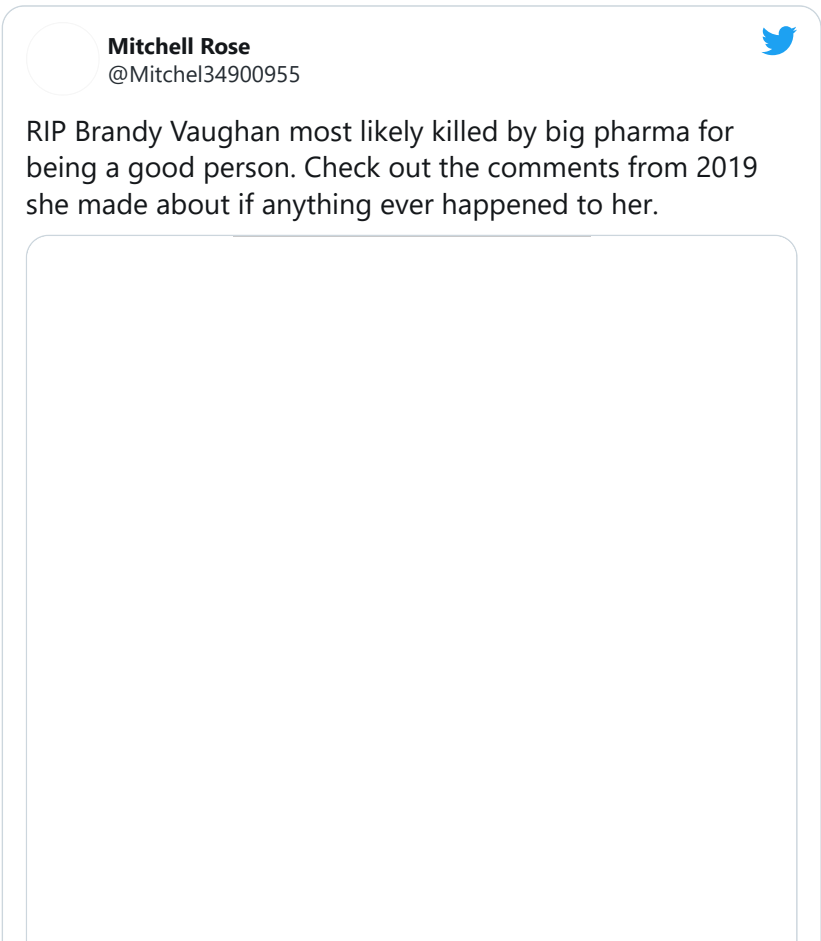

And the following was re-posted just a few days ago:

To date, Brandy's cause of death has *still* not been revealed.

And while completely speculative, Mitchell Rose on Twitter could-well have it right:

Compelling videos, posts, and articles on the subject are being removed left-right-and-center across social media platforms, as well as from YouTube:

In today's world, where large corporations and profit rule, the truth has become harder than ever to obtain, but please keep the faith, we're breaking through...

THE REALITY OF OUR HEALTH

[The below is lifted directly from Brandy Vaughn's website learntherisk.org]

The United States is sicker than ever.

The U.S. spends more than any other country on healthcare yet has more chronic health issues than any other country. Half of all adults in the U.S. have a chronic illness, and nearly half will eventually die of cancer. We are exposed to a cocktail of synthetic chemicals from birth: polluted air and water and processed food laced with pesticides, to which we add pharmaceutical drugs, including vaccines, into the mix.

Pharmaceutical drugs and vaccines contain multiple synthetic chemicals that should NEVER be put into the body. They are part of the reason we have skyrocketing chronic health issues that have somehow become the new "normal" in our society. But this is *not* normal. And science is clear: Most, if not all, of these health issues, can be linked to pharmaceutical treatments and drugs. In fact, the health care system is now the leading cause of death in the U.S.

THE U.S. HEALTHCARE SYSTEM IS A LEADING CAUSE OF DEATH

A 2016 report from Johns Hopkins School of Medicine shows that medical errors in hospitals and other healthcare

facilities are incredibly common, and may now be the third-leading cause of death in the United States — claiming 251,000 lives every year, more than respiratory disease, accidents, stroke and Alzheimer's.

Moreover, a 2014 study found that prescription drugs are now the fourth leading cause of death in the US. The Harvard study reported 2.74 MILLION serious adverse drug reactions per year come from properly prescribed drugs. And about 106,000 people DIE EVERY YEAR from drugs prescribed to them.

In addition to pharmaceutical drugs and medical error, vaccines are put into the mix. Vaccines do *not* create immunity, they create customers. It's the best business model in the world. It keeps people coming back for more — forever.

There are multiple toxic ingredients in vaccines — some known to cause cancer and autoimmune disorders. These toxins create health issues that in turn create customers.

The best defense against disease is a healthy, strong immune system, not overloaded with toxins from food, water, air, and pharmaceutical products.

For more on what we can do, see learntherisk.org.

And you can support the website [here](#) (Brandy's [gofundme](#) page is inexplicably down, but I will continue searching for a new one).

Social Media channels are restricting Electroverse's reach: Twitter are purging followers while Facebook are labeling posts as "false" and have slapped-on crippling page restrictions.

"There is no such thing as a safe vaccine" — Brandy Vaughan

Pfizer Clinical Trials [Update]: Two People Die, Four Develop Bell's Palsy

The FDA announced on Tuesday that currently there is not enough research to guarantee the vaccine's safety for immunocompromised groups, pregnant women and children—yet it is still expected to gain approval on Thursday.

ONE THOUGHT TO "BRANDY VAUGHAN'S DEATH STILL UNDISCLOSED + THE REALITY OF OUR HEALTH"

prioris

🕒 December 11, 2020 at 3:55 pm

People who are supporting the democrats, republicans or even the libertarians or socialists are essentially putting their stamp of approval on the dirty work being carried out behind the scenes. Some people do it thru naivete or ignorance while others sweep the dirty past under the rug. There are a lot of suspicious deaths over the past decades that have been swept under the rug. Unlike most people, I don't forget that past.
