So Tiffany Pontes Dover didn't just faint, she may be dead. If you have links, drop them. Her Instagram and Facebook have no activity but lots of people asking if she's ok. There is also a local death certificate in her name with her family listed. Idk

Mystery and suspicious silence surrounds the state of nurse Tiffany Dover who passed out live after getting the vaccine. It happens at the worst time for business. It has shown us what they are capable of doing for control. I found this video

Someone also posted a message on the networks from which I translate the most important, follow the thread:

"Well, I've been stubbornly investigating more. My gut won't let me down. And it came out to a good, reliable source. And this is what I found. And I want to share with you. Tiffany Pontes Dover died Chi Memorial Chattanooga The truth is that her family is really being pressed to keep her mouth shut and lawyers are trying to reach a financial settlement. They wanted to cremate her after 48 hours so the family had to fight not to let that happen and she was still buried at Higdon. My source is in contact with Tiffany's own daughter and called as her aunt to represent the family. And take care. And confirmed his death in Alabama. "

Replying to @orlandosigut

Mi fuente está en contacto con la propia hija de Tiffany y llamó como su tía para representar a la familia. Y cuídate. Y confirmó su muerte en Alabama."
